(54) Title: AUTOMATED STAINING APPARATUS AND METHOD

(57) Abstract

An automated microscope slide staining apparatus has a moveable arm (30) which carries a wash/blow head (70) having an elongate dispensing slit for supplying wash liquid or drying air across the width of the slides (130) positioned in a heater block (200). In use, water is supplied over the surface to be treated by the wash/blow head (70) and reagents are supplied in a pattern that would not completely cover the surface to be treated and allowed to diffuse through the water to disperse.
